Co-Founder's Communique

Sankar Datta

It is with great anticipation that I share this message on the 39th years of Indian Grameen Services (IGS) journey, especially when the Civil Society in India is facing major challenges from National and International funding sources, rapid change in information and other related technology, because in another year we will be entering the 40th year of IGS, which will be a major milestone we will all celebrate.

I had offered last year to help IGS document 40 of its initiatives over the last 40 years. I am delighted to share with all of you that the team of Dr Sanjib Sarangi and Ms. Prachi Mahajan, a TISS postgraduate, who have been working with the IGS team, have so far documented 24 initiatives of IGS.

These cover ten thematic areas that we have identified for the documentation - including livelihoods based on land and water resource development, agriculture, animal husbandry, forest-based livelihoods, agro-processing,

handloom and handicrafts, rural tourism, financial inclusion, urban solid waste management and institutional development.

The documentation is in the form of sectoral context overview notes, case studies at the program/project level, "zoom-in" case studies at the individual beneficiary level, accompanied by photographs, videos and personal recall memoirs by current or former staff members. So far over 30 IGS colleagues have participated in the documentation, spanning Bihar, Rajasthan, Madhya Pradesh, Maharashtra, Telangana and Odisha.

Over the past year, I have had the pleasure of visiting several of IGS field projects and I look forward to visiting some more projects this year. I have met several IGS regional and project heads and project staff and found them exceptional in their dedication to participatory and sustainable development.

I have also met diverse organisations with whom IGS has collaborated for technical, financial, and program support. This report gives an idea of the range of IGS programs.

I am also pleased to see that IGS continues to invest in capacity building both of the staff as also of the members of the communities IGS works with. The organization's internal systems for planning, budgeting, implementation, and monitoring and communicating have been strengthened.

As one of the co-founders of IGS, along with Vijay, Biswajit Sen and Deep Joshi, it gives me great satisfaction to see the work of IGS and its contribution to the development of marginalized and excluded communities.

With my best wishes

Chairperson's Communique

Swati Bhargava Desai

It gives me immense pride to witness Indian Grameen Services advancing its mission of inclusive growth and sustainable livelihoods with renewed energy and impact.

This year's performance has vindicated our strategy to sharpen our focus on grant-based projects. The progress in this area has been worthy of note. What is more, our efforts have succeeded in generating a certain momentum that promises to deliver ever increasing returns in the years to come. Success in any organisation, no doubt, comes from hard work and persistence. But equally important is the feel-good factor that positive results generate in all who participate in the effort. There has been a perceptible and welcome change in the energy level in the organisation and confidence that we will achieve whatever goals we set for ourselves.

The projects that have come to our portfolio have diverse themes and partners. The dialogue that is taking place has enriched our experience and our vision. We are grateful to the community that has placed its funds and trust with us. We hope to strengthen our bonds with our many contributors and showcase our unique position in the area of social development.

During my visit to the project sites along with fellow Directors and the IGS team, I personally witnessed the deep community engagement and the quality of work being carried out on ground. I take this opportunity to convey my thanks to the teams in IGS that have delivered on their promise.

But for their dedication and hard work, the success that we see today would not have been possible. My sincere thanks also to the Board and our mentors who have been guiding our efforts. The future promises to be bright and ever evolving towards our commitment to uplift the communities that we serve. The social sector has no doubt been beset with many challenges in the recent past and it is to our credit that we have been able to navigate the troubled waters and retain our sense of purpose and our unflinching faith in what we do.

Director's Communique

Sattaiah Devarakonda

I am pleased to state affirmatively that IGS has made significant strides in last 3 years in bringing focus on high impact projects improving livelihoods of the low-income families. It has posted annual growth of 25% in Income in the last 3 financial years. And more importantly, it has enhanced strength of the organisational systems procuring projects, execution, monitoring, fund management, corporate communications and employee management. As a result, it earned 3 prestigious awards CSR Universe Social Impact Awards 2024, Catalysing Social Impact 2024 and ICRT India Award 2024 (Silver Honor) and appreciation from each of the partners and collaborators. I express my sincere gratitude to all the Government, CSR Partners, Domestic and International Donors funding IGS. I applaud the entire team of IGS for this wonderful turn around and congratulate Mr. R S Solanki COO and Dr. Sanjib Sarangi Chief Fundraising & Partnerships Officer for their mature leadership.

IGS is phenomenally contributing to BASIX Mission on Livelihoods, and I am confident that it makes further progress ahead under the leadership of Mr. R S Solanki and Dr. Sanjib Sarangi.

Chief Operating Officer's Communique

Radheshyam Solanki

It gives me immense pleasure to present the Annual Report 2024–25 of Indian Grameen Services, capturing our journey of impact and learning.

I am proud to present the FY 2024–25 Annual Report, highlighting a year of strategic growth, impactful partnerships, and unwavering commitment to inclusive development at Indian Grameen Services (IGS).

This year, we empowered rural communities through diverse livelihood programs—agriculture, natural resource management, and non-farm entrepreneurship—while advancing youth capacity building and gender equity. We implemented 24 projects across 11 states, reaching 1,98,435 households in 2,411 villages.

With a 51% growth rate, we expanded into 10 new locations across seven states, supported by seven new partners. These milestones reflect the dedication of our teams, the trust of our stakeholders, guidance from our Board, Strategic support from our founder, and the resilience of the communities we serve.

As we move forward, we remain committed to our vision: Sustainable Livelihoods, Prosperous Households. Together, we will continue to innovate and create lasting impact.

Let us carry this momentum forward—with purpose, passion, and the belief that empowered communities can shape a brighter, more resilient future.

VISION

“कायम रोज़गार, खुश-हाल परिवार”

Sustainable Livelihoods - Prosperous Households

IGS envisions an equitable world where the poor and marginalized in rural areas, have access to livelihood opportunities on a sustainable basis, and are prosperous and happy.

MISSION

Incubating innovations for pro-poor sustainable livelihoods

To augment access of poor to sustainable livelihoods, IGS sees itself as a laboratory for incubating innovations that address the most pressing and resilient of livelihood challenges faced by the poor.

IGS fosters transformative community development and livelihoods through natural resource management, sustainable agriculture, livestock, renewable energy, non-farm entrepreneurship. It empowers marginalized and vulnerable groups of community and and capacity-building for sustainable, locally led development.

MEET OUR *Co-Founders*

SANKAR DATTA

Well known for his work in the field of livelihood support, as a part of institutions like PRADAN, IGS and BASIX. Professor and former Head of the Livelihood Initiative in the Azim Premji University (APU), Bengaluru. Member of the Faculty of IRMA and IIM-A.

DEEP JOSHI

Indian social worker and NGO activist and a recipient of the Magsaysay award in 2009 and Padma Sri awardee in 2010. Recognized for his leadership in bringing professionalism to the NGO movement in India. Co-founded PRADAN and IGS.

VIJAY MAHAJAN

Co-founded PRADAN in 1983, IGS in 1987 and the BASIX Social Enterprise Group in 1996. Co-authored the book The Forgotten Sector and has written over 60 articles. Alumnus of IIM-A and IIT-Delhi, and a mid-career fellow at Princeton University, USA.

MEET OUR BOARD MEMBERS

SWATI BHARGAVA DESAI CHAIRPERSON

Ms. Desai holds a Master's degree in Economics from the University of Bombay and an LLB from the University of Delhi. She brings over 35 years of distinguished service with the State Bank Group, where she built deep expertise in credit, retail banking, and international finance. As the Managing Director of SBI's brokering subsidiary, she led its transformation and strategic growth for four years.

SATTAIAH DEVARAKONDA DIRECTOR

Mr. Sattaiah holds an MBA from Osmania University and has been associated with the BASIX Group for over 29 years. He led various business initiatives in micro-credit, micro-insurance, financial inclusion, skill building and human resource development at BASIX. Currently serving as the Group CEO & MD of the BASIX Social Enterprise Group, he brings extensive experience in inclusive finance and livelihood promotion.

VIJAY KULKARNI DIRECTOR

Mr. Kulkarni has over 40 years of experience across the public, private, and non-profit sectors. His areas of specialisation include banking, entrepreneurship, microfinance, NGO incubation, education, livelihoods, research, and consulting. He holds a post-graduate degree from the Tata Institute of Social Sciences (TISS), Mumbai, completed a Management Education Programme at IIM Ahmedabad, and also holds a postgraduate diploma in Gandhian Studies.

ID PRASAD DIRECTOR

With more than four decades of experience in microenterprise development and consulting, Mr. Prasad has played a pivotal role in fostering entrepreneurship and small business support systems. He formerly served as the Chief Consultant and Advisor at APITCO Limited, a Technical Consultancy Organisation (TCO), contributing significantly to industrial and technical support to MSMEs through Cluster development, Microenterprise development and propagation of Innovative Rural technologies.

IGS has impacted more than 3 million households since its inception

Across

2,411 Villages in India in FY 2024-25

ABOUT US

Indian Grameen Services (IGS) is a non-profit organization registered under Section 8 of the Companies Act, 2013, dedicated to addressing pressing challenges in the rural and forested areas of India. Our focus is on developing and implementing innovative solutions in a demand-driven, impact-conscious and livelihood support services in a cost-efficient manner.

We contribute to the larger mission of fostering sustainable livelihoods, particularly for the rural poor and women. With a presence in 11 states, 55 districts, 101 development blocks, in the FY 2024-25, we facilitated diverse range of livelihood initiatives.

Tracing our History

1987

Under the aegis of PRADAN, Indian Grameen Services (IGS) was set up to undertake research and development in commercially viable in livelihood promotion activities.

1996

As the case for adopting market-based approaches to complement traditional grant-based voluntary work for the poor became clear, stock of IGS was transmitted to the promoters of BASIX SEG. In this new role, IGS initially functioned as an incubator for the newly formed Non-Banking Finance Company (NBFC) called Bhartiya Samruddhi Finance Ltd. (BSFL). developed range of micro finance products and services to be offered to the underserved economically active poor communities.

Over the years, IGS has evolved into a crucible for incubating innovative solutions to contemporary livelihood challenges, through action research, for the entire BASIX Social Enterprise Group.

OUR VALUES

- **Equal opportunity:** As a livelihood promoting agency and an equal-opportunity employer, IGS ensures that entry and growth in the organisation are non-discriminatory in terms of caste, colour, age, religious affiliations, and gender.
- **Fairness and transparency:** Organizational processes and systems are transparent, ensure fairness and are geared to address any employee's grievances.
- **Cultural and religious freedom:** IGS provides space to employees to embrace their culture and follow their religious beliefs.
- **Gender-sensitive:** IGS pro-actively designs policies to attract and retain women professionals, in response to the gender divide that marks all aspects of the Indian society.
- **Statutory compliance and respect for law:** IGS ensures that its processes and practices and compliant with all prevalent statutory norms; it respects and abides by the laws of the land.
- **Recognize and reward performance:** IGS strives to establish well-designed appraisal and reward systems including performance pay.
- **Creating Innovating & Learning Platforms:** IGS encourages and recognizes employee efforts to learn, grown and innovate on personal and professional fronts. It embraces technological advancements to create platforms to facilitate these processes.
- **Impact & Results:** These are non-negotiable.

OUR WORK CULTURE

Our hearts are invested in the work we do, therefore, as an organisation, we have always strived to create an environment and culture that helps our team members feel like a part of something much bigger than just their tasks.

The OCTAPACE framework proposed by Udai Pareek and T.V. Rao gives us an eight-dimensional picture of what our organisational culture looks like and helps us periodically assess and self-modulate the culture of IGS in terms of the following aspects:

- ◆ **Openness:** We feel free to express our ideas; the organization is open towards new ideas by anyone or ways of doing things and strengthening systems leading to better decision-making.
- ◆ **Confrontation:** Whenever employees face problems, they work jointly with others to find its solution without hiding or avoiding them - for fear of hurting each other - thereby broadening their outlook.
- ◆ **Trust:** We trust each other and can be relied upon to 'do' every last thing we have committed.
- ◆ **Authenticity:** It is the value underlying the trust and willingness of a person to acknowledge the feelings he/she has; and the quality of being trustworthy.
- ◆ **Proactive:** We are action-oriented, willing to take initiative and show a high degree of proactivity by anticipating issues and acting or responding to the needs of the future.
- ◆ **Autonomy:** We have some freedom to act independently, within the boundaries imposed by our role/job, thereby leading to a higher standard of accountability.
- ◆ **Collaboration:** This involves working together and using one another's strength for a common cause such as sharing our concerns with one another and preparing strategies, action plans, and implementing them.
- ◆ **Experimenting:** We emphasize the importance given to innovation and trying out new ways of dealing with problems/issues in the organization.

Outreach

Indian Grameen Services (IGS) has been instrumental in promoting and enhancing Natural Resource-Based Livelihoods (NRBLs) through an integrated approach that combines sustainable resource management, capacity building, and ecosystem restoration. With over three decades of experience, IGS has developed impactful strategies to address the challenges faced by rural communities dependent on natural resources.

Key focus includes:

1. Promoting Sustainable Practices for Livelihoods

- IGS emphasizes sustainable use and management of land, water, and forests to enhance productivity and reduce environmental degradation.
- It supports practices like natural and regenerative farming, agroforestry, and soil health revitalization to increase agricultural yields while ensuring ecological balance.
- The organization facilitates the preparation and adoption of low-cost, localized Package of Practices (PoPs) tailored to agro-climatic conditions.

2. Capacity Building and Community Empowerment

- Conducts comprehensive training programs for Panchayati Raj Institutions (PRIs), Self-Help Groups (SHGs), Village Organizations (VOs), and farmers to equip them with knowledge and skills for better resource management.

- Build community cadres to ensure local leadership in implementing natural resource-based livelihood initiatives.
- Facilitates Behavioral Change Communication (BCC) to improve practices related to health, hygiene, and resource conservation.

3. Integrated Natural Resource Management

- Focuses on restoring degraded land through soil and water conservation measures.
- Promote micro-irrigation systems and renewable energy solutions to reduce GHGs.

4. Advanced Tools and Technology

- Utilizes Geographic Information System (GIS) tools for precise planning and development of Detailed Project Reports (DPRs) for villages, aiding efficient resource allocation and project implementation.

5. Ecosystem Restoration and Agro-ecological Enhancement

- Initiate programs to restore ecosystems by integrating biodiversity conservation with livelihood enhancement.
- Works on improving the agro-ecological environment by reintroducing native crops, promoting intercropping, and implementing sustainable farming systems.

- Reduces risks for agricultural producers by ensuring the natural availability of essential inputs, driving down costs while increasing resilience.

6. Convergence with Government Programs

- Aligns its projects with government schemes like MGNREGA and collaborates with line departments to create convergence for larger-scale impact.
- Facilitates multi-stakeholder partnerships to bring together resources, technical expertise, and policy support.

7. Climate Resilient Agriculture

- Promotes climate-smart agricultural practices like drought-resistant crops, zero-tillage farming, and water-efficient irrigation systems.
- Implements risk mitigation strategies like crop insurance and early warning systems to safeguard farmer livelihoods.

IGS implements **Project Rawta's Green Revival: Building Climate Resilience through Sustainable Practices at Rawta, Delhi**, showcasing integrated, community-led climate resilience through sustainable livelihoods, agroforestry, and eco-tourism initiatives.

 Over 209 villagers were oriented on the project objectives, roles, and responsibilities

 Developed training modules on natural farming, livestock and soil health management, and sustainable agriculture practices

 150 farmers supported in livestock breed improvement

 Established partnership with Krishi Vigyan Kendra (KVK), Ujwa, Delhi for soil and water quality assessment in the project area

In **Restoration of Riparian Areas of Narmada River Basin of Narmadapuram District, Madhya Pradesh**, supported by **Harit Bharat Fund**, IGS is developing a model for restoring riparian areas and supporting its scaling up, starting with the Narmada River basin for the emergence of the appropriate Peoples Institution (Harit Narmada Sangathan) to build social capital and take stewardship.

-  8 nos. Harit Narmada Sangathans have been formed as village-level institutions to foster collective decision-making and ensure long-term environmental stewardship.
-  23 hectares of riparian areas restored through plantation
-  15 hectares of riparian areas restored through Assisted Natural Regeneration (ANR)
-  102 community partners engaged across 41 hectares for sustainable agriculture
-  559 community members were capacitated and opportunities created through convergence

IGS got actively involved with the **High Impact Mega Watershed Project**, supported by **Bharat Rural Livelihoods Foundation (BRLF)**, is primarily implemented in **Gondia District, Maharashtra**, aims to enhance rural livelihoods and ecosystem resilience through integrated watershed management by conserving natural resources, improving soil and water health and empowering communities with capacity building.

 Participatory Rural Appraisal (PRA) exercise conducted across 134 villages

 INR 2.35 Cr funds were leveraged for convergence

 65 farmers were trained on convergence by Agricultural Department officials

Khemendra Kumar Rinayat,
Sarpanch, Buraditola Panchayat
District: Gondia,
State: Maharashtra

Earlier under MGNREGA, our village lacked structured planning, and development works were carried out randomly without a long-term vision. Over the past two years, with support from IGS, this has changed significantly. IGS introduced us to technical and GIS-based planning and helped prepare a detailed DPR focused on soil and moisture conservation. Approved by the Gram Sabha, implementation will begin soon. A key intervention, the Doha model in the village nala, improved the groundwater levels and highlighted the value of conservation. With IGS's guidance, our village is now progressing toward sustainable development.

My name is Ajay Chandrasingh Padvi, and I am from Mangrul village in Nandurbar district, Maharashtra. I come from a landless family. Under the Samruddha Kisan Project, implemented by Indian Grameen Services (IGS), I received a battery-operated spray pump. Over the past year, this spray pump has helped me get spraying work on other farmers' fields. I worked for about 14-15 days in total, earning INR 200 per day—around INR 2,800 to INR 3,000 annually. The rest of the time, I work as a farm labourer. This spray pump has reduced my physical effort and proved very helpful.

Ajay Chandrasingh Padvi,
District: Nandurbar
State: Maharashtra

IGS has involved in the **Samruddha Kisan Project implemented at Nandurbar District, Maharashtra** aims to evolve an Integrated Village Development Model (IVDM) to improve lives and livelihoods, strengthen community wellbeing, and attain sustainability of the targeted families through various interventions.

- 4,485 households of 15 villages were covered
- 50 trellis-based vegetable plots established in 13 villages in implementation area
- 100 farmers provided with agri tools
- 100 farmers provided with bund plantation
- 400 farmers supported with kitchen garden saplings
- 100 farmers supported maize demonstration plots
- 75 units of solar light provided in the project area
- 31 farmers provided with Income Generation Activity (IGA) support. This included material support provided for garage, puncture repairing shops, snacks corner, saloon and petty shop
- 220 schools of 15 intervened villages supported with educational & playground kits which benefited more than 600 students
- 20 farmers were supported to grow groundnut seed production plots
- 20 farmers were supported to prepare vermi compost beds
- 255 farmers were supported for land levelling in their farmland out of which more than 74 farmers started using their treated land for cultivation in their newly levelled land
- 3 units of solar based drinking water facilities provided
- 39 farmers provided with solar based irrigation pump
- 20 families provided with input support in the form of goat

IGS is implementing the **Project SAMARTH at Murshidabad district, West Bengal**. The objective is to enhance the livelihoods of all small & marginal farmers and landless households through improved agriculture practices, livestock management, and irrigation facilities.

- 1,635 farmers supported with agriculture input support
- 549 farmers supported with livestock input support
- The average paddy productivity per acre increased by 17.32%, from 1,616 kg/acre in 2023-24 to 1,896 kg/acre in 2024-25, indicating significant growth. For 5% of farmers, paddy cultivation costs per acre decreased by 26.39%, while for 16% of farmers, both productivity and income from paddy cultivation per acre rose by 17.38%.
- For 14.62% of farmers, mustard cultivation expenditure dropped by 52.35%. Mustard productivity rose by 13.10% for 8.38% of farmers, and lentil productivity increased by 25% for 3.5% of farmers. Additionally, mustard income grew by 2.02% for 15.82% of farmers, and lentil income rose by 5.42% for 7.54% of farmers.

IGS implemented the **Coastal Care project under Nayara Energy's Habitat Improvement and Conservation Initiatives at Mumbai, Maharashtra**. The objective was to address solid waste management concerns and promote better management practices among residents, ensure sustained cleanliness and immediate cleaning needs, facilitate Behavioral Change Communication (BCC) for improved health and hygiene, and foster relationships, resilience, and collaboration among stakeholders at the coastline of Carter Road.

- 10 Beach Ambassadors were engaged in conducting mobilization, providing feedback from households
- 250 households were provided with colour coded dustbins along with demonstration on how to segregate waste, IEC materials disseminated in local languages

My name is Damyanti Bai Verma, and I am from Randhal Gram Panchayat. I serve as the President of the Kaveri Self Help Group. Earlier, we women survived by doing small, uncertain jobs with no stable income. Then Indian Grameen Services (IGS) came to our village, trained us to make organic manure, and helped us set up a unit. Now, we collectively produce and sell organic manure to local farmers, which has boosted both our income and confidence. With support from IGS, we also reclaimed an encroached land and plan to grow fruit trees. I hope more women come forward, unite, and become self-reliant.

Damyanti Bai Verma
President of Kaveri Self Help Group
District Narmadapuram , Madhya Pradesh

Indian Grameen Services (IGS) has made significant strides in empowering rural communities by integrating sustainable natural resource management with livelihood enhancement. Through diverse projects across India, IGS has demonstrated its ability to address environmental challenges while fostering community resilience and economic sustainability. Its initiatives, including sustainable farming practices, ecosystem restoration, capacity building, renewable energy solutions, and convergence with government programs, have positively impacted thousands of households.

Through localized solutions, and multi-stakeholder partnerships, IGS continues to create replicable models of development, inspiring long-term stewardship of natural resources and sustainable livelihoods for rural communities.

Outreach

Indian Grameen Services (IGS) plays a critical role in transforming rural livelihoods through the promotion and development of agriculture and allied activities. With its deep expertise in agrarian systems, IGS adopts a multi-faceted approach to enhance productivity, income, and sustainability for farmers and rural communities. Key focus includes:

1. Sustainable Agriculture Development

- Promotes eco-friendly farming practices like organic agriculture, integrated pest management, and soil health restoration.
- Facilitates crop diversification to reduce risks and improve resilience against climate variability.
- Introduces advanced technologies like precision farming, drip irrigation, and solar-powered micro-irrigation to optimize resource use.

2. Capacity Building and Skill Development

- Conducts extensive training for farmers, Self-Help Groups (SHGs), and Producer Groups on improved agricultural techniques, post-harvest management, and value chain development.

- Builds the capacity of Panchayati Raj Institutions (PRIs) and Village Organizations (VOs) for better governance and implementation of agri-based livelihood projects.

3. Promotion of Allied Activities

- Strengthens allied sectors like Livestock, Horticulture:
- Encourages small-scale agro-enterprises to diversify incomes.

4. Value Chain Development and Market Linkages

- Supports producer groups and farmer collectives to aggregate produce and achieve economies of scale.
- Establishes market linkages for agri-products, ensuring fair prices and reducing intermediaries.
- Develops agri-enterprises by connecting farmers to retail chains, export markets, and e-commerce platforms.

5. Convergence with Government Schemes

- Aligns agri-allied projects with government programs like MGNREGA, PM-KISAN, and Rashtriya Krishi Vikas Yojana to maximize impact.

6. Women and Youth Empowerment in Agri-allied Sectors

- Encourages the participation of women in activities like dairy, poultry, and value-added processing to enhance their economic role.
- Engages rural youth in agri-entrepreneurship and modern farming techniques to create sustainable livelihoods opportunities.

IGS is implementing **Project HIGHLANDs (Inclusive Growth for Highland Landscapes) in Lower Dibang Valley, Shi Yomi Districts of Arunachal Pradesh & Sonitpur District, Assam.** The objective is to Empower community & Social Capital, Improve Livelihoods & Economic Prosperity, Community & Climate Resilience, Local Collaboration & Convergence, Developing Community Champions (Cadres) & Drive Transformation.

- Currently engaged with 329 HHs
- 50 HHs provided with Orchard support
- 30 HHs provided with Poultry support
- 15 HHs provided with Goatery support
- 234 villagers provided with Green Energy Transition support such as Solar Home Light and Solar Street Light

IGS is implementing the **Shwethdara Program at Narmadapuram District, Madhya Pradesh.** Through this program, IGS aims at enhancing cattle productivity, improving farmers' livelihoods, and promoting sustainable dairy operations.

- 200 villages and 16,694 farmers were mobilized
- 5 Pashu Vikas Kendras (PVK) were established
- Shwethdara Call Centre, a Toll-Free number launched (1800 1211 1011). A total of 4,795 calls were received on various livestock services during FY 2024-25
- FPC launched its own cattle feed brand as "Rewatiri"
- INR 1,40,97,453 is the total revenue generated from various services such as Artificial Insemination, and sale of cattle feed & mineral mixture, green fodder and Agri Inputs
- 200 Community Cadres (Gramsakhis) were engaged as women entrepreneurs

I am grateful to Indian Grameen Services for providing me the support on Marigold farming. Marigold flowers are in high demand during festivals, weddings, and cultural events. They are found to be more resistant to weather changes. So, I started marigold farming on my own 0.25 acres of land with technical support from the IGS & Agriculture Production Cluster (APC) team, on farming techniques and best practices. Within 3 months I was able to earn a total of INR 20,000 by selling flowers.

Mamata Naik
Community Champion,
Village: Ratanpur
District: Sundergarh, Odisha

I had been raising goats at home earlier, but I was not aware of the scientific methods of animal husbandry. Indian Grameen Services introduced me to new aspects of goat rearing. About six months ago, through Project SAMARTH, the IGS team supported me with three goats and an azolla pit, in addition to the three goats I already had. Today, I own 14 goats and have learned to take care of them using healthy and scientific practices. I am proud to call myself a goat entrepreneur.

Punia Oraon
Oraon Adibasi FPG Member
Village-Dhulipahari, Block- Farakka
District: Murshidabad, West Bengal

IGS is executing **Project SAAKSHYAM at Nandurbar district, Maharashtra**. The objective is to Empower community & Social Capital, Improve Livelihoods & Economic Prosperity, Community & Climate Resilience, Local Collaboration & Convergence, Developing Community Champions (Cadres) & Drive Transformation.

 Village Development Committee (VDCs) has been formed across 15 villages

 50 agricultural demonstration plots have been established in the fields, supported by hands-on assistance and technical guidance

 Land leveling work completed for 20 farmers, covering approximately 20 acres of land

 4 units of solar-based lift irrigation systems installed in four villages. A total of 13 farmers has benefited from this initiative, and an estimated 15-20 acres of land will be brought under irrigation

 30 HHs were provided with solar home lighting kits

IGS also implemented the **Mukhya Mantri Janajati Jeevika Mission (MMJJM) across 5 blocks of Mayurbhanj district, Odisha**. The objective of the program was ensuring sustainable livelihoods for ST families through diverse livelihood measures, infrastructure development, and improved living standards. Strengthening governance and community institutions, fostering social mobilization, and promoting capacity building. Supporting project sustainability through professional planning, implementation, and monitoring while ensuring convergence with national and state flagship programs for holistic development.

 154 scheduled tribe habitation villages were selected covering 6,739 households

 61 nos. of entrepreneurs across 5 blocks were identified

“

I express my heartfelt gratitude to Indian Grameen Services (IGS). Through the Mukhya Mantri Janajati Jeevika Mission (MMJJM), I received support for a micro-entrepreneurial activity tailored for tribal youth. Although I was a trained beautician, my financial constraints had prevented me from starting my own beauty parlor. With the intervention of IGS and support from the Integrated Tribal Development Agency (ITDA), Karanjia, I was able to establish my beauty parlour business and now earn a minimum of INR 10,000 per month.

”

Tapaswini Naik
Entrepreneur

Village-Arjunbilla,Block- Sukruli
District: Mayurbhanj, Odisha

I am Ramlagan Kumar, Director of Silao Agro Farmer Producer Company (FPC), and I am delighted to share how this initiative has transformed the lives of farmers in our region.

Earlier, like many fellow farmers, I faced constant challenges in getting a fair price for our produce due to the involvement of middlemen. This often left us with little profit and no bargaining power. However, the establishment of our FPC, with the support of Indian Grameen Services and NABARD under the 10K CSS FPO initiative, has changed everything. Our FPC has created a reliable platform for us to sell our produce directly at fair prices. It also ensures timely access to quality agricultural inputs such as seeds, fertilizers, and other essentials.

Thanks to the guidance and continuous support from Indian Grameen Services and NABARD, we have seen a marked improvement in our farming practices and income levels. The FPC has truly been a turning point for our community, and I am confident it will continue to uplift and empower farmers for years to come.

Ramlagan Kumar,
Director,
Silao Agro Farmer Producer
Company (FPC)
Nalanda, Bihar

The **Odisha PVTG Empowerment & Livelihood Improvement Program (OPELIP)** aims to improve the living conditions and reduce poverty for vulnerable households.

-  3,494 Micro Enterprises were promoted
-  1,930 PVTG (Particularly Vulnerable Tribal Groups) SHGs availed PEF (PVTG Empowerment Fund)
-  162 Customer Service Providers were strengthened
-  34 PGs promoted for selling of agri & NTFP (Non-Timber Forest Products)
-  62 new agro processing units were established

The **Promotion of Agriculture Production Cluster (APC) project** implemented at **Sundergarh and Mayurbhanj, Odisha** aims to enhance the productivity, profitability, and sustainability of small and marginal farmers.

-  4,649 women farmers are mobilized
-  866 women received income
-  3,738 women received institutional credit through SHG/Bank/PG/KCC etc.

In **Jajpur, Odisha** IGS is implementing the **Project Livelihood Enhancement of People in Mining Affected Areas of Jajpur District through Management of Guava Orchard (under District Mineral Foundation)**. The objective of the project is to develop a sustainable guava orchard managed by rural women, leveraging community-based models of agriculture.

-  350 WSHG (Women Self Help Groups) members were selected with recommendation of Gram Panchayat Level Federation (GPLF) from 5 nos. of villages and 2 nos. of gram panchayats
-  05 nos. of PGs (Producer Groups) are formed
-  Farmer Producer Company (FPC) in the name of Sukinda Amrud Women Farmers Producer Company Limited (SAWFPCL) has been formed
-  A total number of 51,286 guava plants in a 350 acres land plot has been distributed among the 350 WSHG members. They will take care of cleaning, Integrated Pest Management (IPM), Integrated Nutrient Management (INM), Deweeding and Pruning

Indian Grameen Services (IGS) continues to redefine rural development by fostering sustainable agricultural practices, enhancing allied sectors, and empowering communities with targeted interventions. Through capacity-building efforts, and climate-resilient strategies, IGS effectively addresses the multifaceted challenges faced by farmers and rural populations. The projects exemplify its commitment to improving livelihoods, promoting women’s economic empowerment, and building community resilience. Through approaches like value chain development, convergence with government schemes, and community-led models, IGS demonstrates its capacity to drive transformative and inclusive growth while contributing to ecological sustainability and economic prosperity for marginalized communities.

NON-FARM ENTREPRENEURSHIP AND ENTERPRISE DEVELOPMENT

**“Driving Inclusive Growth through Innovative Non-Farm
Entrepreneurship and Enterprise Growth”**

	<p>2,051 nos. Skill trainings provided</p>	<p>Implementation Outreach</p>
	<p>64 nos. Homestays supported</p>	<p> Districts 13</p>
	<p>308 individuals Livelihood Empowerment</p>	<p> Blocks 20</p>
		<p> Villages 191</p>
		<p> Households 18,000</p>

Outreach

Indian Grameen Services (IGS) plays a pivotal role in fostering non-farm enterprises and promoting entrepreneurship among marginalized communities. Through its interventions, IGS creates sustainable livelihood opportunities beyond traditional agriculture. Key roles include:

1. Capacity Building and Skill Development

- Organizing skill development and entrepreneurship development programs (EDPs) tailored to local market needs.
- Training youth and women in non-farm skills.

2. Market Linkages and Business Support

- Supporting the establishment of micro-enterprises and self-help groups (SHGs) for collective marketing and business scaling.

3. Business Incubation and Mentorship

- Offering business incubation support, including mentoring, business plan development, and performance monitoring.
- Creating networks with experienced professionals and industry experts to guide budding entrepreneurs.

4. Policy Advocacy and Institutional Support

- Advocating policies that support the growth of rural non-farm enterprises.
- Strengthening community institutions to act as hubs for entrepreneurial activity.

5. Promoting Inclusivity

- Encouraging the participation of women, tribal youth in non-farm enterprise initiatives.

IGS is implementing the **Safe Tourism Destination for Women project across 6 districts Narmadapuram, Chhindawara, Seoni, Umaria, Shahdol and Anuppur** of Madhya Pradesh. The objective is to create women-friendly and safe environments at tourist destinations.

- 139 women / girls are placed in different sectors. INR 8,500 to INR 14,500 is the average earning per month in placement
- 139 women / Girls working started self-owned business. INR 6,000 to INR 7,000 is the average earning per month in self-owned business

Types of skill development activities:

- Hospitality & Housekeeping, Food & Beverage, Handicraft, Retail & Sales, Guide, Front Office/Receptionist, Computer Operating, Gypsy Driving, Mehendi Training, Tour & Travel, Security Guard, Photography

Sarita Choudhry,
Gardener at Hotel Amaltas,
Madhya Pradesh

“ I sincerely thank the Madhya Pradesh Tourism Board and Indian Grameen Services from the bottom of my heart for making my long-held dream come true—a dream I had seen years ago but was unable to fulfil.

Through the project, I received the opportunity to work in garden maintenance at Amaltas Hotel. Today, I am very happy and able to sustain my livelihood smoothly. The skill training provided under the Safe Tourism Destination for Women initiative by Indian Grameen Services has opened new doors and made this opportunity possible.”

“ Under the Rural Tourism Homestay Project of Madhya Pradesh Tourism Board, I am hosting guests at my homestay located near the popular tourist destination of Satpura Tiger Reserve. With the support of Indian Grameen Services, I have earned INR 90,000 over the past 18 months through various tourism-related activities and guest night stays.

We are extremely grateful to Indian Grameen Services for making this possible, helping improve our economic condition, and enabling us to provide a better life for our children. This support has allowed them to focus on their education and given us hope for a more sustainable and secure livelihood.”

Poonam Nagwanshi,
Homestay Owner of
Mandhan View,
Madhya Pradesh

In 4 districts Narmadapuram, Chhindawara, Seoni and Umaria of Madhya Pradesh, IGS is supporting the Rural Tourism Project by orienting the community for constructing homestays which includes orientation and mobilization efforts. The project targets the Gond tribes.

- INR 5,47,700 /- has been the collective earnings so far from days staying in the Rural Tourism project.

Since January 2025, IGS has started implementing the Maharashtra Inclusive Livelihoods Project at Nandurbar & Nasik district, Maharashtra.

The primary objective of the project is to reach the extremely vulnerable, especially women, and not only alleviate poverty and improve social outcomes, but also build future resilience of 6,000 households.

- The team has prepared two major guidelines which focus on inclusion and exclusion criteria for identification of ultra-poor households and their selection process using Participatory Rural Appraisal
- 99 nos. of Samruddhi Sakhi and 13 nos. of Cluster Samruddhi Sakhi have been selected so far under the program

In FY 2024–25, IGS made significant strides in empowering women and promoting inclusive livelihoods across Madhya Pradesh and Maharashtra. Through the Safe Tourism Destination for Women project, women have gained economic independence via placements and entrepreneurship. The Rural Tourism initiative fostered tribal engagement and income generation, while the Maharashtra Inclusive Livelihoods Project laid a strong foundation for resilience-building among vulnerable households. With community-based approaches, skill development, and targeted support systems like Samruddhi Sakhis, IGS continues to create pathways for social and economic transformation in underserved regions.

RESEARCH BASED INITIATIVES

“Pathway to Development of Locally Led Development (LLD) Index”

In 2024-25, Indian Grameen Services (IGS) have made significant progress in its research project **“Donors and Locally Led Development (LLD): Transforming Relationships for Strong and Resilient Communities”** aimed at developing the Locally Led Development Index (LLDI), supported by the United States Agency for International Development (USAID). This project endeavors to create a comprehensive framework to assess and promote locally led development practices. Below is a summary of the key achievements during the year.

Pilot Survey, Main Survey and Insights on Implementing Organizations:

To refine the data collection tools, after the scoring workshop and questionnaire updation, the team conducted the second round of a pilot survey during June and July of 2024. The pilot study helped assess the applicability of the tools and provided crucial insights into the landscape of implementing organizations. The length of the questionnaire was too lengthy, and it was decided that the interview would be conducted in a narrative question and answer format elucidating targeted responses from the interviewees. The research team initiated their Qualitative and CAPI based quantitative interviews in September 2024.

Purposive and Snowball Sampling methods were applied to select a total of 100 organizations: 30 donors, 60 implementers, and 10 impact-building organizations.

Round Table Precision Pathways: Channelizing Scores for LLD:

On May 24, 2024, the research team successfully organized a consultation workshop involving diverse stakeholders.

The workshop was instrumental in identifying the scores to be assigned to the relevant components, indicators, and sub-indicators to be used for constructing the LLDI. This collaborative scoring exercise provided constructive insights to design a robust index by integrating insights from practitioners and experts in the field.

Preparation of Technical Note:

The Technical Note on Locally Led Development Index was prepared to structure a draft LLDI based on finalized components, indicators, sub-indicators and insights from donor organizations, implementing organizations, and impact-building organizations.

Through these efforts, the project had made remarkable strides in laying the groundwork for the development of the LLDI.

Progress Chronicles

Building Farmer Resilience and Market Linkages through Agro-Enterprises in Rajasthan

Pushkar Kisan Samridhi Producer Company Limited, a Farmer Producer Company (FPC) formed by Indian Grameen Services and supported by NABARD, is based in Pushkar, Ajmer, Rajasthan. The company specializes in producing and trading a diverse range of value-added products derived from gulkand, rose, and Indian gooseberry (amla).

Among the 727 shareholders, 232 are women, and the company manufactures and markets 15–20 different products, including various delicacies made from gulkand and Indian gooseberry. The FPC works closely with 2,615 small and marginal farmers, ensuring fair pricing, increasing annual incomes, and promoting sustainable agricultural practices

The company has developed advanced processing facilities that produce premium-quality products while overcoming several challenges, such as limited awareness and access to gulkand, rose, and amla-based products, quality consistency, seasonal availability affecting supply chains, and regulatory hurdles in international markets.

To address these challenges, strategies are being implemented to boost awareness through targeted marketing, unique branding, and certifications to meet quality standards and tackle competition. Additionally, the adoption of efficient management systems for seasonal products and enhanced market research are expected to support FPCs international expansion.

With an annual turnover of INR 10 lakh and a 10% profit margin, the company is now focusing on scaling up. Efforts are underway to expand the product range in terms of flavors, sizes, packaging, and geographical reach. Investments are also being made in manufacturing infrastructure, marketing, branding, and farmer strengthening initiatives.

Looking ahead, the company plans to enhance its revenue model through bulk production, explore markets and develop strategic partnerships to drive sustainable growth.

Restoration of Riparian Areas: A Conservation Initiative in Narmada Basin, Madhya Pradesh

Indian Grameen Services (IGS) has been associated with The Nature Conservancy (TNC) as a partner since 2018, playing a pivotal role in scaling up restoration efforts along the banks of the Narmada River. The collaboration began with a few villages and was later expanded to cover five clusters, owing to the success of the initiative. This success is attributed to the scale and nature of the work, with a strong emphasis on maintaining quality and ensuring timely execution.

The dedication of the IGS team, along with a strong spirit of collaboration, has been instrumental in sustaining this long-term partnership and ensuring effective restoration in the region. Building on this success, IGS signed a new contract with TNC, effective from

September 2022 to September 2024, further extending restoration efforts to both existing and new locations.

Despite various field-level challenges, the IGS team has consistently met its targets over the past two years. The institutional and policy support provided by TNC has played a key role in facilitating the project's smooth implementation.

During this period, the project was engaged with 7,770 households across 33 villages. The team identified 66 restoration sites covering a total area of 276.89 hectares in five blocks—Sohagpur, Pipariya, Narmadapuram, Makhan Nagar, and Seoni Malwa—within Narmadapuram district.

The intervention led to the restoration of 276.89 hectares of riparian land, with 97,541 saplings representing 33 different species planted. The project achieved a 72% plantation survival rate. Several previously rare or locally extinct species such as Karanj, Arjun, Shisham, Baheda, Amla, Bamboo, and Guava were successfully reintroduced.

Furthermore, the initiative created 79 restoration champions and engaged 34 Poudh Rakshaks (plant caretakers) to ensure long-term maintenance and sustainability of the restoration efforts.

When Clean Hands Shape Young Minds: Malpur School's Revival Journey

For nearly 5–6 years, the Zilla Parishad School in Malpur village, Nandurbar district, Maharashtra faced severe challenges due to inadequate sanitation facilities and lack of access to safe water. These issues affected over 100 enrolled students, significantly disrupting their learning environment and posing serious health risks. The absence of functional toilets and handwashing stations led to poor hygiene practices, frequent illness, and absenteeism, particularly among girl students. The unhygienic conditions created an unpleasant and demotivating atmosphere, hampering both attendance and academic engagement.

Recognizing these critical gaps, Indian Grameen Services with support from ASK Foundation, under the Samruddha Kisan Project, initiated a comprehensive school

renovation intervention to improve the basic infrastructure. One of the most impactful improvements was the construction of a modern handwashing station, thoughtfully designed to encourage daily hygienic practices among both students and staff. To ensure sustainability and behavioural change, a series of awareness sessions were conducted before the renovation. These sessions focused on safe drinking water, personal hygiene, handwashing techniques, the importance of a balanced diet, and basic nutrition.

Moreover, to address the persistent water scarcity, a high-capacity submersible pump was installed and connected to an overhead water tank. This ensured a consistent and reliable supply of water for the handwashing station and for other sanitation-related needs across the school premises.

This integrated approach not only improved the school's physical infrastructure but also fostered a healthier and more conducive learning environment. It instilled lifelong hygiene practices among children, empowering the community with knowledge and dignity through better sanitation and water access.

Women Entrepreneurs Power Rural Dairy Services in Madhya Pradesh's Shwetdhara Initiative

In partnership with IDFC FIRST Bank, Indian Grameen Services (IGS) is implementing the Shwetdhara Program in Narmadapuram District, Madhya Pradesh. The program aims to enhance cattle productivity, improve farmers livelihoods, and promote sustainable dairy operations. To date, 200 villages have been covered, and 16,694 farmers have been mobilized.

To overcome the challenges small and marginal dairy producers face in accessing development services, IGS established five self-sustaining Pashu Vikas Kendras (PVKs) in the blocks of Babai, Bankhedhi, Narmadapuram, Pipariya, and Sohagpur. These centres deliver training and awareness on artificial insemination, heat detection, nutrition and feeding management, disease and health management, animal sheds and care. Complementing this effort, the Shwetdhara toll-free number (1800-1211-1011) was launched, receiving 4,795 calls during the year for support on artificial insemination,

infertility/repeat-breeder cases, primary cattle health counselling, nutrition, and general inquiries.

Meanwhile, the FPC Jeevanodak Milk Producer Company Ltd. introduced its own cattle-feed brand, "Rewatiri," and 200 Gramsakhis have been engaged as women entrepreneurs, serving as local community cadres. IGS initiated its cattle feed and livestock input business through the Farmer Producer Company (FPC) in 200 villages. The total cumulative business generated a revenue of INR 2.58 Crore through the involvement of 200 Gramsakhis. These Gramsakhis earned incentives ranging INR 3,000-10,000 per month through this business. During this period, IGS completed 12,226 artificial inseminations for breed improvement in these 200 villages, resulting in more than 7,000 new calves, additionally treated 6,046 animals in this period.

Breaking Barriers: Women Transforming Tourism In Madhya Pradesh

A historic milestone has been achieved in the state of Madhya Pradesh as first women only Hotel Amaltas in Pachmarhi in is functioning in collaboration with the Madhya Pradesh Tourism Board (MPTB) and the Madhya Pradesh State Tourism Corporation. Previously, these women weren't engaged anywhere and struggled to find income sources to support their families. Under the Safe Tourism Destination for Women (STDW) project, Indian Grameen Services mobilised the girls and women, build their capacities and required skills set. Currently. Now, these women work as receptionists, housekeepers, cooks, stewards, and security personnel, among other roles. More than 20 women are employed at this hotel. Their salaries ranges INR 8,000-15,000 depending on their various job roles.

They are now happily employed at Hotel Amaltas and inspiring others to seek job opportunities.

From Struggle to Sustainability: Gita's Organic Path to Prosperity

Gita Oram, a small land holder farmer has been cultivating traditional crops like paddy and vegetables on her 0.5-acre land for years. However, the returns were often inconsistent. Seeking better income, she decided to shift to cucumber cultivation—a crop with high market demand and quick returns. She selected an open-pollinated variety, Pusa Suyodhana, known for high yield and disease resistance. Gita prepared her sandy loam soil using a tractor and enriched it with compost and farmyard manure. She treated the seeds with a mild fungicide and soaked them overnight for better germination. Cucumber seeds were sown directly in rows with 10–12 inches spacing and 3 feet between rows. Though early rains supported germination, Gita used simple furrow irrigation during dry spells. Regular weeding and organic mulching helped retain moisture and control weeds. For pest management, she used neem oil and garlic spray and introduced ladybugs to control aphids.

Challenges:

She faced issues with aphids and fungal infections during the rainy season, but organic practices helped manage them. Fluctuating market demand was tackled by building strong ties with local vendors.

Outcomes:

- Yield: 4,000 kg of cucumbers
- Revenue: INR 80,000 (Average market price of INR 20 /- per kg).
- Net Profit: INR 50,000

Future Plans:

Gita aims to expand cultivation to one acre and pursue organic certification for better prices. She's also exploring direct-to-consumer sales.

Gita's story shows how small-scale farmers can achieve profitability through smart crop selection, organic practices, and market planning.

Catalysts of *DEVELOPMENT*

“I am Bhanupriya Padvi, working with Indian Grameen Services since 2023 under the Samruddha Kisan project, supported by ASK Foundation, in Nandurbar district. This opportunity has allowed me to engage closely with rural communities and understand their lives more deeply.

Working across agriculture, natural resource management, public health, and women empowerment, I have not only supported local development but also gained valuable personal insights.

Understanding villagers’ challenges, offering practical solutions, and witnessing positive change has been truly fulfilling. Seeing joy and hope in their eyes reminds me of the real impact of my work.

This journey is more than a job—it’s a social commitment and a path of purpose.”

Bhanupriya Padvi
Field Coordinator

Samruddha Kisan Project, Nandurbar, Maharashtra

“Since joining Indian Grameen Services (IGS) in 2022 as a Part-Time Plant Protector (PTP), I have experienced firsthand the organization’s commitment to environmental restoration and rural development. With IGS’s support, I led a plantation initiative in my village, Aharkheda, which has now flourished—those saplings have grown into 10 to 12 feet high trees. Seeing this transformation fills me with immense positivity and motivation. Inspired by IGS’s vision, I am now replicating similar restoration efforts in other villages. With the blessings of Maa Narmada, the trust and guidance of my team, even the most challenging tasks feel achievable under IGS’s nurturing ecosystem.”

Rohit Singh Rajput
Restoration Coordinator
Restoration of Riparian Areas of Narmada River Basin
Narmadapuram, Madhya Pradesh

I joined the IGS family as a Community Resource Person (CRP) in May 2024. Since then, I have been working with tribal women farmers in my locality to enhance their income through cluster-based vegetable cultivation, livestock rearing, collective marketing, mushroom cultivation, and NPM farming. Earlier, I was dependent on my family for expenses, but now I am financially independent and support them. Initially, I struggled to communicate with farmers, but with IGS's support, I now organize training programs for them. I am proud of my journey and growth. Thank you, IGS, for your constant support and capacity building.

Jyotsnarani Gagrai, CRP
Agriculture Production Cluster, Sukruli, Mayurbhanj,
Odisha

I have been associated with Indian Grameen Services (IGS) through the Mangalajodi Ecotourism project, where I initially oversees the tourism management at the village. At that time, I had no prior experience in the tourism sector. However, the learning environment at IGS—especially the guidance of senior management—was truly transformative. Their mentorship helped me gain a deep understanding of the project and marked a turning point in my professional journey.

After eight years of dedication, I was honored to join IGS as a professional to execute Rural Tourism initiative in Madhya Pradesh & now, I am an Asst. Manager— a proud moment for me.

Reena Sahoo, Assistant Manager
Rural Tourism and Safe Tourism Destination for Women project
Madhya Pradesh

The implementation of the MOVCD-NER project in Soreng District has significantly transformed the agricultural landscape, particularly by promoting organic farming as a viable and sustainable livelihood option. Through structured training programs, certification support, and facilitation of market linkages, farmers have successfully transitioned from traditional practices to more organized, market-oriented organic cultivation. The formation of Farmer Producer Companies has further enabled collective action, improved access to quality inputs and markets, and enhanced income security. This transformation stands as a testament to the effectiveness of a community-driven approach and underscores the valuable role played by Indian Grameen Services in strengthening the organic value chain and rural enterprise ecosystem in the region.

Bijay Kumar Rai, Field Executive
MOVCD-NER Project
Soreng District, Sikkim

My cow was not producing enough milk, and her female calf was weak, underweight, and unable to conceive. After I started feeding Rewatiri a balanced animal diet, her milk production increased by one and a half liters, and she became pregnant again on time. I also became a shareholder of the Jeevanodak Milk Producer Company under the Shwethdharma program, which gave me access to veterinary support. The doctor examined the calf, gave her deworming medicine and a mineral mixture, and continued to monitor her health regularly. I am very happy now, as my monthly income has increased due to improved livestock services.

Narmadapuram, Madhya Pradesh

IGS in Action: Conferences & Beyond

Our Chief Fundraising & Partnerships Officer, Dr. Sanjib Sarangi, had the honor of being a speaker at the Food Systems Summit 2024 held in New Delhi from October 15–17, Organized by Food and Land Use Coalition India - FOLU India and Bharat Krishak Samaj, the summit brought together diverse voices to tackle the most pressing challenges in India's food systems. During the session Dr. Sanjib Sarangi highlighted integrating wetland and farming ecosystems to promote non-chemical food production, reduce costs and emissions, and tackle farmers' economic challenges. Citing the Mangalajodi wetland in Odisha, he shared how IGS's regenerative agriculture pilot improved crop quality, soil and water health, and enhanced wetland restoration through sustainable catchment-based practices.

Dr. Sanjib Sarangi, Chief Fundraising & Partnerships Officer at Indian Grameen Services, served as a panelist at the National Conclave on Social Sector Federations, organized by Dhvani Foundation in Bengaluru from 3-5 February 2025. The panel, centered on the theme "Donor Perspective on Federations and Collectives," convened prominent sector leaders to discuss evolving funding dynamics. Dr. Sarangi contributed key perspectives on the shifting donor landscape and highlighted strategic avenues for mobilizing resources to enhance growth

and resilience of federations. The conclave brought together six federations representing more than 200 NGOs, fostering a rich platform for dialogue, collaboration, and the exchange of knowledge to further strengthen the social development ecosystem.

Mr. Bhaskar Singh Baghel, Regional Head, Madhya Pradesh & Rajasthan participated in the 2nd edition of Aahvaan: NGO-CSR Conclave from 10-11 February 2025 at Vishwa Yuvak Kendra Campus in Chanakyapuri, New Delhi. The relevance of this conclave lies in its potential to foster impactful collaborations between NGOs and corporations and leverage their unique strengths to address pressing social challenges effectively. By bringing together financial resources and technical expertise from corporations and exploring the grassroot knowledge and community engagement of NGOs, this conclave aimed to create synergistic partnerships that promote sustainable and inclusive development.

Together for Change

In collaboration with IDFC FIRST Bank, IGS implemented the Shwethdara program in Narmadapuram district, Madhya Pradesh. The initiative was rolled out across 200 villages. The program aimed at enhancing cattle productivity, improving farmers livelihoods, and promoting sustainable livestock management and women led entrepreneurship and enterprise.

IGS signed a grant agreement with the Azim Premji Foundation to implement Project SAMARTH in Farakka Block, Murshidabad District, West Bengal. The project aims to enhance the livelihoods of 5,000 small and marginal farmers and landless households through improved agricultural practices and livestock management.

IGS signed a Memorandum of Understanding (MoU) with the Directorate of Horticulture, Agriculture & Farmers' Empowerment (A&FE), Odisha, for implementing the Agriculture Production Cluster (APC) project in Sukruli Block, Mayurbhanj District. The project aims to enhance the productivity, profitability, and sustainability of small and marginal landholders through farmers collective.

IGS signed an agreement with the Harit Bharat Fund for the continuation of restoration of riparian areas in the Narmada River Basin, Narmadapuram District, Madhya Pradesh.

IGS signed an agreement with NatWest Digital Services India Private Limited to implement the project Rawta's Green Revival: Building Climate Resilience through Sustainable Practices, in Delhi NCR. The project aims to demonstrate community-based climate change adaptation through an integrated model by introducing community-led bird tourism, non-farm entrepreneurship, climate-resilient agriculture and livestock management, agroforestry, and plantation-based restoration initiatives.

IGS and HDFC Bank signed an agreement under its Parivartan Initiative to implement Project titled as HIGHLANDs in Arunachal Pradesh and Assam, SAAKSHYAM in Maharashtra. The objective of the projects is to empower communities and strengthen social capital, enhance livelihoods and economic prosperity, build community and climate resilience, promote local collaboration and convergence, develop community champions (cadres), and drive transformational change.

A MoU was signed between the District Horticulture Office, Jajpur District, Odisha, and IGS for the project Livelihood Enhancement of People in Mining-Affected Areas of Jajpur District through Management of Guava Orchard (with financial support by the District Mineral Foundation). The objective of the project is to develop a sustainable guava orchard model managed by rural women.

IGS signed an agreement with Nayara Energy Limited to implement the Coastal Care project under Habitat Improvement and Conservation Initiatives at Carter Road, Mumbai. The project aims to address challenges of the dependent communities, promote better waste management practices among residents, ensure sustained cleanliness, facilitate Behavioural Change Communication (BCC) for improved health hygiene, and foster relationships, resilience, and collaboration among stakeholders.

A Memorandum of Agreement (MoA) was signed between the Department of Agriculture, Sikkim, and IGS for the promotion of Farmer Producer Organizations (FPOs) under the scheme “Mission Organic Value Chain Development for the North-Eastern Region (MOVCD-NER)”.

IGS signed an agreement with STICHTING BRAC INTERNATIONAL to establish a Project management Unit at UMED-Maharashtra State Rural Livelihood Mission and implement the Maharashtra Inclusive Livelihoods Project in Nandurbar and Nashik districts of Maharashtra. The objective of the project is to reach 6,000 extremely vulnerable populations, especially women, to not only alleviate poverty and improve social outcomes but also build the future resilience.

What Our Partners Say

"We at BRAC International, are striving for a world where extreme poverty no longer exists – where everyone can realize their potential and better their lives. This is the base of our collaboration with the Indian Grameen Services under the Maha-Samruddhi Yojana and reflects our shared belief in a community-led and government-enabled approach to end extreme poverty. Through a combination of deep grassroot knowledge and global experience, we are building scalable and dignified pathways for people in extreme poverty to earn sustainable, long-term livelihoods".

Shweta Banerjee
Country Lead
BRAC International, New Delhi

"At IDFC FIRST Bank, we are proud to partner with IGS in transforming rural livelihoods across 200 villages in rural Madhya Pradesh. Their presence across five blocks and their ability to mobilize 315 Gram Sakhis working as grassroots change agents, reflect a rare combination of scale, depth and community trust.

IGS stands out for its community-first approach and its ability to build farmer owned institutions like Jeevanodak FPC. The launch of Rewatiri cattle feed and ₹3.76 crore in revenue generation till date are strong examples of how local entrepreneurship can thrive with the right support

What truly sets IGS apart is its leadership. Their senior team is deeply involved in field operations, consistently engaging with teams and communities. As founding partners of this initiative, we have experienced their openness to feedback and their commitment to continuous improvement. Every suggestion we offered was met with thoughtful dialogue and swift action, making this partnership not just effective but deeply collaborative".

Rachana Iyer
Head - Corporate Social Responsibility
IDFC FIRST Bank, Mumbai

Kuldip Singh, CEO
Bharat Rural Livelihoods Foundation
New Delhi

"At BRLF, we strongly believe that partnerships are the cornerstone of creating transformative change at scale. Our collaboration with Indian Grameen Services in the High Impact Mega Watershed Project across Maharashtra and Chhattisgarh is a reflection of this commitment. IGS's deep community connect, technical expertise, and dedication in implementing the project on the ground have been instrumental in bringing sustainable solutions to rural communities. Together, we are not only rejuvenating critical watersheds but also enabling resilient livelihoods for thousands of smallholder households. This partnership stands as a testimony to how collective action can pave the way for inclusive and lasting rural development"

Shilpi Jain
Ex- DDM (District Development Manager),
NABARD, Ajmer, Rajasthan

"With the steadfast support of NABARD, Indian Grameen Services (IGS) has successfully facilitated the establishment of a Farmer Producer Organisation (FPO) truly owned and governed by its farmers shareholders. This initiative stands as a testament to IGS's commitment to inclusive development, where experienced and knowledgeable farmers are mobilised to mentor and uplift small and marginal farmers in the region. IGS has nurtured a culture of entrepreneurship among farmers, enabling them to transcend economic challenges and take charge of their livelihoods. The journey from subsistence to self-sufficiency has been both inspiring and impactful, reflecting IGS's dedication towards rural communities.

FPO raised with the support of IGS does not only represent a collective economic model but also symbolises the empowerment of those who were once at the margins of agricultural progress. The transformation of farmers into entrepreneurs is a commendable achievement, and we celebrate IGS's pivotal role in making this vision a reality"

"I extend my heartfelt congratulations to Indian Grameen Services for their remarkable journey of steadfast commitment to last-mile communities. Through our collaborative Focused Development Project, their impactful interventions in the remote regions of Arunachal Pradesh and Assam have significantly contributed to fostering sustainable livelihoods and empowering communities with dignity and purpose. Our partnership with Indian Grameen Services has been deeply meaningful, and I sincerely appreciate their dedication and on-ground engagement. I wish the entire team continued success and hope they scale even greater milestones in the years ahead".

Vikas Kumar
Regional Head, Northeast and Pan
India Project
HDFC Bank, Mumbai

Supriya Jhunjunwala
Regional Operations Director South Asia,
Water.org

"I have had the privilege of partnering with IGS over the past 12 years or so in two of my former roles as an Advisor with GIZ and as the climate Environment and Emerging issues Lead with the NatWest Group.

I have witnessed the remarkable impact of Indian Grameen Services (IGS) in transforming rural livelihoods through innovation, commitment, and community-driven action. By combining deep grassroots engagement with forward-looking solutions, IGS has empowered farmers, women, and entrepreneurs to access markets, reduce risks, and build sustainable enterprises like sustainable tourism and sustainable agriculture. Their holistic approach—spanning agriculture, natural resources, and non-farm livelihoods—demonstrates how inclusive models can uplift entire communities. What makes IGS truly exceptional is its ability to listen, adapt, and co-create with people at the last mile. I strongly commend their work in shaping resilient and self-reliant rural economies".

Awards & Recognitions

SOCIAL IMPACT AWARD 2024

Indian Grameen Services (IGS) has been honored with the Social Impact Awards 2024 by The CSR Universe in the category of Sustainable Environment. This award recognizes the exceptional work conducted by IGS in advancing environmental sustainability while promoting sustainable livelihood within local communities.

Financial Statements for the year ended March 31, 2025

ACKNOWLEDGEMENT

We are deeply grateful to our dedicated employees, communities, and stakeholders, whose commitment and support have been the cornerstone of our progress this year. Your hard work and trust have truly made a lasting impact.

Our heartfelt thanks also go to our esteemed Board of Directors and Co-Founders for their vision and guidance, which continue to shape our journey with clarity and purpose.

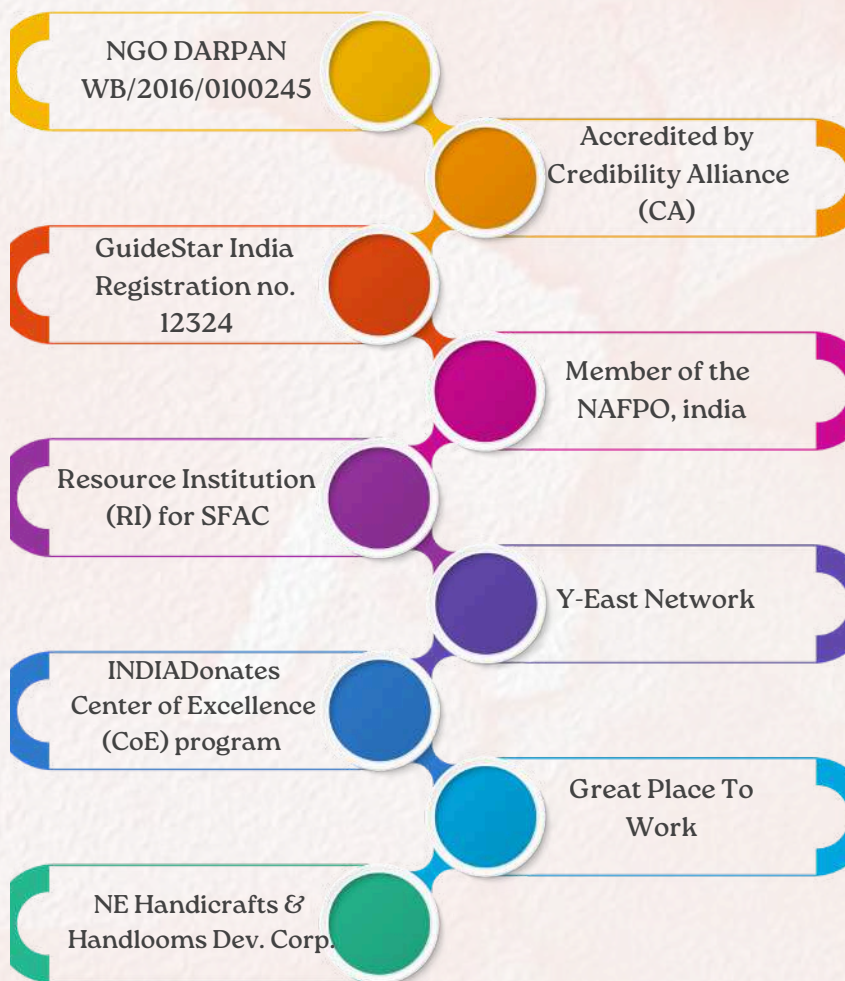

It is through the collective spirit and efforts of this exceptional team that we have achieved important milestones and moved closer to our shared goals

Thank you for your continued dedication, partnership, and for journeying with us.

To our Editorial Team

"We extend our sincere appreciation to the Editorial Team— Mr. Radheshyam Solanki, Dr. Sanjib Sarangi, Mr. V. Avijeet Kumar, and Ms. Namrata Mondal—for their meticulous curation and dedication, which have significantly contributed to bringing this report to fruition."
